Summary

Final-year Business Computing undergraduate at Universiti Malaysia Sabah. Builds full-stack, AI-native applications and mobile and desktop apps, with a focus on game development. Competent in MERN stack, AI and system development through hands-on project experience. Seeking an AI/ML engineering or relevant software engineering and full-stack internship.

Technical Skills

Languages: TypeScript, Python, Kotlin, Rust, Java, C#, C++, HTML5, Tailwind CSS, PHP
Frontend: React, React Native, Tauri, GSAP, Three.js
Backend: Node.js, Express, MongoDB, PostgreSQL, REST APIs
AI/ML: Machine Learning, Hybrid RAG, Agentic AI, VLM, NLP
Tools & Design: Figma, Git/GitHub, Vercel, PDF/OCR processing

Honors & Languages

Honors: Dean's List (Semesters 1, 2, 4, 6), UMS Technology Talent Hub 2024 Initiative Finalist, 5th UMPSA X HUAWEI GameCenter Mobile Game Competition (Ongoing), AI4SDGs 2026 Space AI Solution Competition (Ongoing)
Languages: Chinese (Native), English (Fluent), Malay (Fluent), Dutch (Beginner), German (Beginner)

Selected Projects

Kairo: AI-Native Personal Knowledge Management System

Rust, Tauri, React, TypeScript, Supabase, PostgreSQL, SQLite, Hugging Face, RAG, Machine Learning

- Built a desktop personal study application with hybrid Retrieval-Augmented Generation (RAG) mechanism (BM25, RRF, and MMR), semantic knowledge graph, agentic AI assistant workflow with Research Mode and VLM capabilities.
- Implemented Reinforcement Learning algorithms and adaptive spaced repetition scheduling (FSRS) mechanism to improve long-term study retention.
- Developed a companion mobile app with React Native to sync with Kairo desktop app for study convenience.

Essence

LangChain, FastAPI, Machine Learning, MERN Stack

- Developed a contextual AI assistant for lifelong learners with web search capabilities and tool-calling.
- Adapts to each learner's interests and provides personalised learning suggestions.

Pressed.

MERN Stack, Axios, Stripe API, Supabase

- Developed a modern vinyl store to browse and purchase music records with real-time order tracking.
- Implemented an admin interface to manage inventories, order status, revenue statistics, and purchase trends.

Other Projects: Last Song - Mobile pixel art exploration platformer with built-in AI adaptive entities to predict player movements and hiding timings; CampusVoice - Feedback and suggestion system for university students with AI sentiment analysis.

Leadership

- Vice Secretary, E-Sport UMSLIC, 2025 - 2026
- Director of Sergeant-at-Arms, Rotaract Club (RACUMSKAL), 2025 - 2026
- Bureau of Academics, Pembimbing Rakan Siswa KAL (PRSKAL), 2024 - 2025

Education

Oct 2023 - Sep 2027 (Expected)

Bachelor Of Information Technology with Honours (Business Computing)

Universiti Malaysia Sabah Kampus Antarabangsa Labuan (UMSKAL), Labuan, Malaysia

- Relevant coursework: Artificial Intelligence, Data Structures

Oct 2022 - Aug 2023

Foundation in Information Technology

Universiti Malaysia Sabah, Sabah, Malaysia
